Introducing ... Roemer
Rapid Protos

**Rapid Protos:
Priority Prototype
Service in
48 Hours**

When you need a quick prototype before a part can be ready for production, Roemer Rapid Protos can help you reach your goal.

Immediately our team can start the Roemer proto process pronto and within 48 hours have your customized prototype on its way to you.

Contact a Roemer Account Manager by [email](#) or call **1-330-448-2000 ext. 4** to find out how your prototype can be completed in 48 hours.

Roemer Industries is a well-known supplier in the custom identification industry with an extensive product offering.

In this edition of *Roemer Reports*, you will learn about our newest offering ...

ROEMER RAPID PROTOS

Introducing ... Roemer Rapid Protos Complex Parts. Fast.

Roemer Industries has always been at the cutting edge in custom identification product technology. To remain at the forefront of this industry, Roemer is proud to announce **Roemer Rapid Protos**.

With the recent addition of our high speed, CNC, milling and machining capability, Roemer's manufacturing arsenal for rapid prototyping is greatly enhanced. This new high speed machine is useful for fast prototyping and extrusion profile milling. It operates with a probe and vision system which aids in part recognition, registration, and quality.

In combination with other computer/digital equipment, we can now deliver short run parts without the need for custom film and hard tools. We have eliminated most of the lead time involved in a new part.

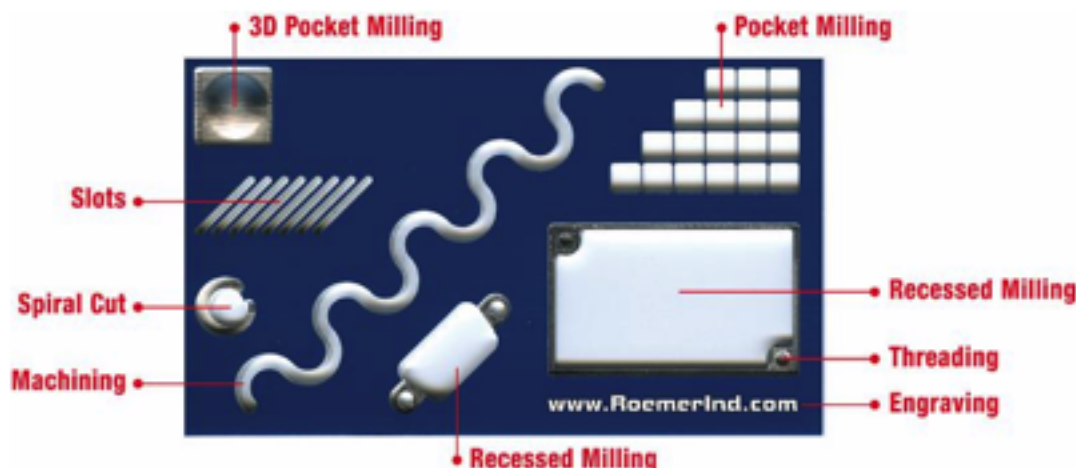

"It is a brave new world" our CEO Joe O'Toole recently uttered, "and we are on the inside looking out. We must embrace technology, learn it, perfect it and exploit it for the benefit of our customers."

The **DATRON** high speed CNC milling system can also accomplish additional operations and effects for your Product ID requirements. "We are only limited by our ability to Imagineer," said O'Toole.

Roemer specializes in finding solutions to graphic identification needs through the creative use of graphics applications, fabricating technologies and superior service. Our customers receive the graphic identification products they need when they need them, no matter how complex.

Call us now to discuss your unique requirements and see what **ROEMER** can do for **YOU!** **330-448-2000 ext. 4**

Here are a few examples of what this amazing machine can do for you.

Products

Front panels
Printed circuit boards
Plastics machining
UID marking

Nameplates
Aluminum machining
Rapid prototyping
And more!

Materials

Aluminum
Stainless Steel
Ceramic

Plastics
Graphite
And more!

Roemer's CNC machine provides all of these features and gives us the flexibility to produce low volume and high mix production engraved parts at a reasonable cost.

Contact us by [email](#) or call **1-330-448-2000 ext. 4** and let us know how Roemer Rapid Protos can customize a solution for you.
